# **Ethanol Standard FS\***

#### **Order Information**

Cat. No. Kit size

#### **Intended Use**

Standard for use in DiaSys tests for quantitative in vitro determination of ethanol on automated photometric systems.

### **Description**

Ethanol Standard FS is an aqueous standard.

The standard is used to calibrate the DiaSys test Ethanol FS.

#### Storage

The standard, both opened and unopened, must be stored at  $2-25^{\circ}\text{C}$ . Avoid contamination and protect from light. Do not freeze.

#### Stability

Unopened: Up to the date of expiry indicated on the kit

Opened: The content of the vials must be used immediately

after opening, since the indicated concentration changes due to evaporation. Opened standard vials

shall be used only once.

Proper storage and handling of this product must be observed.

# **Warnings and Precautions**

- Contains sodium azide (< 0.1%) as preservative. Do not swallow! Avoid contact with skin and mucous membranes.
- 2. In case of product malfunction or altered appearance that could affect the performance, contact the manufacturer.
- Any serious incident related to the product must be reported to the manufacturer and the competent authority of the Member State where the user and/or patient is located.
- Please refer to the safety data sheets (SDS) and take the necessary precautions for the use of standards.
- For professional use only.

## **Waste Management**

Refer to local legal requirements for chemical disposal regulations as stated in the relevant SDS to determine the safe disposal.

# **Preparation**

The standard is ready to use.

### **Materials Required**

General laboratory equipment

#### **Procedure**

Please refer to the reagent package insert for instructions for use.

## Standard Value

Standard value has been determined under standardized conditions using the DiaSys test Ethanol FS. The standard value is traceable to the initial weight of a primary material with a purity of 99.9% ethanol.

### Concentration

1.0 mg/mL Ethanol
